ABOUT ME

I am an Engineering student doing BTech in Artificial Intelligence and Machine Learning(2nd Year) with a strong interest in data-driven systems and experienced in Python,SQL, and basic GUI development. I have been building projects like student marksheet system that integrates database management and user interface design.i enjoy learning new tools and improving my problem-solving approach.

EDUCATION

2024-2028

MADHAV INSTITUTE
OF TECHNOLOGY
AND SCIENCE

BACHELORS IN ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

BTech in AIML and the vision is to become a distinguished student in artificial intelligence, empowering innovation,research and creating solutions to address real world-challenges with societal relevance

PROJECTS

- Built a **STUDENT MARKSHEET SYSTEM** using Python and SQL with a GUI (Tkinter)
- Designed database to manage results of students
- Built a **STUDY PARTNER** using Python and ML models
- designed database to personalise the experience of students
- Built an **AI Text Detector** using HTML,CSS & JavaScript
- designed database using SQLite to manage the history and results of text detection system

SKILLS

- Leadership
- Communication
- Teamwork
- Problem solving
- Python,C/C++
- SQL,Tkinter,Git
- Flask/Node.js
- Basic MATLAB

AREAS OF INTEREST

- AI
- Automation
- System Design
